

"Only Tomorrow's Harvest Is Fresher"

To whom it may concern:

This letter certifies that Babé' Farms Inc. does not use any genetically modified organisms in our farming practices. In addition, Babé' Farms Inc. has on file in our main office letters from our seed suppliers verifying that our seed purchases are GMO free.

Furthermore, Babé' Farms Inc. follows safe growing practices and has a field HACCP program which includes but is not limited to pesticide residue test of all fields by PrimusLabs.com. Specific aspects of Babé' Farms Inc. program can be reviewed within our nested web site on PrimusLabs.com's site (www.primuslabs.com).

All processing, ranch harvest crew, cooling, cold storage and facility and product Microbiological, pesticide residue results and safe production manuals (including GAP, GMP, HACCP and trace recall programs) are posted with a secured intranet site. (<http://intranet.primuslabs.com/babe/userlogin.asp>).

Babé' Farms, Inc. produce is Certified for pesticide residue prior to harvest. Once again frequency of testing is posted (<http://www.primuslabs.com/babe/fagap.html>) on their web site.

PrimusLabs.com controls the contents and presentation of the data within this site.

In short, Babé' Farms, Inc. has implemented a comprehensive system of preventative measures and analytical reviews designed to assure that the produce we sell not only meets all regulatory guidelines and mandates, but our stringent safety standards as well.

Sincerely,

Ron Labastida

Ron Labastida
